OLD TALLINN

A sea coast capital, a rare jewel in the north of Europe in the Gulf of Finland, that's Tallinn. With one of the most completely preserved medieval cities in Europe it is a precious city on the UNESCO World Heritage List.

Once a medieval Hanseatic town and for long periods in history dominated by the Germans, Swedes and Russians, Tallinn today contain lots of influence from those days but still manages to retain an Estonian soul and identity. This is not a huge capital, just about 400 000 inhabitants. A very rich cultural and pleasant atmosphere and many interesting sights to be explored (from <http://www.tallinn.com>).
